EDUCATION

Huazhong University of Science and Technology

B.E. in Computer Science

GPA: 3.92/4.00

Sept. 2020 - Jun. 2024

PUBLICATION

Symmetry-Preserving Program Representations for Learning Code Semantics

Kexin Pei, Weichen Li*, Qirui Jin*, **Shuyang Liu**, Scott Geng, Lorenzo Cavallaro, Junfeng Yang, Suman Jana

Accepted by Symposium on Machine Programming (MAPS), 2023. (workshop version)

Submitted to International Conference on Learning Representations (ICLR), 2024. Under Review.

RESEARCH EXPERIENCE

Exploiting Code Symmetries for Learning Program Semantics

Columbia University

Advisor: Suman Jana

Mar. 2023 - Aug. 2023

- Employed Tree-sitter to construct Program Dependence Graphs (PDGs) based on data and control dependencies between statements.
- Implemented nine types of semantic-preserving source transformations.
- Evaluated a range of traditional and LLM baseline models for method name prediction.

Enhancing Code Semantics Learning with Fine-Grained PDGs

University of Chicago

Advisor: Kexin Pei

Sept. 2023 - Present

Extended our existing work from inter-statement analysis to intra-statement analysis, constructing fine-grained Program Interpretation Graphs for the model to learn code semantics.

- Static typed language: Employed JavaParser to extract dependencies between tokens for Java.
- Dynamic typed language: Applied PyType to perform static type inference for Python.

Automatic Identification of Bug Inducing Commits

CASTLE Lab, Hong Kong University of Science and Technology

Advisor: Ming Wen

Ongoing

- Systematically validated bug-fixing and associated bug-inducing commits for 237 bugs across five large open-source Java projects via bisect testing.
- Reproduced SZZ Unleashed algorithm on Defects4J database.
- Improved BIC candidate detection by integrating Failure Coverage analysis with SZZ Unleashed.

EXCHANGE PROGRAM

Real-time Traffic Sign Recognition with Adversarial Training

School of Computing, National University of Singapore

Advisor: Terence Sim

May. 2022 - Aug. 2022

- Role: Student Team **Leader**
- Constructed and tuned a CNN; Implemented a suite of innovative data augmentation techniques to improve adversarial robustness and generalize to diverse scenarios.

TECHNICAL SKILLS

- Languages:** C/C++, Java, Python (Pytorch, Tensorflow)
- Tools:** Git, Linux, LaTeX, CodeQL, JavaParser, and Tree-sitter
- Areas of Interest:** Software Engineering, Security, Compilers, and Machine Learning
